Prerequisites: Introduction to Computing
and Windows Basics

Class Location: Coronado Center, Room 5

A. Course Description:

Basic features of digital camera and what to look for when buying and using your digital camera will be discussed and shown. Students will get hands-on computer experience with basic editing techniques such as cropping, enhancing, removing red eye, moving an image from one photo to another and removing imperfections in a photo. Sizing and resolution will be discussed as well as some the many ways to share photos from email, to putting them on the web and making slid shows with music.

B. Method of Instruction:

Lecture, discussion, question and answer, demonstration, hands-on computer use related to the course and student demonstration of course related tasks. Many items and examples will be shown for visual enhancement of your learning.

C. Course Objectives:

Objective 1. Students will successfully communicate what to look for when buying and using a digital camera, and know where to go for help within the Club and online.

Objective 2. Students will successfully demonstrate basic editing techniques such as cropping, enhancing, and removing red eye.

Objective 3. Students will successfully demonstrate the process removing imperfections from a photo and of moving an image from one photo to another.

Objective 4. Students will successfully be able to distinguish between sizing and resolution.

Objective 5. Students will successfully learn the process of sharing photos using e-mail, placing them on the internet and making slide shows with music
