Prerequisites: Introduction to Computing
Windows Basics

Class Location: Coronado Center, Room 5

Course Description:

This class will offer information about using digital cameras, understanding settings, and useful photography tips. We will also use the free software Picasa to help students learn how to quickly organize and edit your photos with the greatest of ease. This class is for those who want to learn more about their digital camera and who love inexpensive simplicity and ease with photo editing.

Method of Instruction:

This course uses hands-on computer use. Lecture, demonstration, discussion, question and answer will be used as related to the course. Students will demonstrate course related tasks.

Course Objectives:

Students will gain basic information on photography and learn many facets of digital cameras.

Students will learn how to download the free photo editing software of Picasa.

Students will successfully demonstrate basic editing techniques such as cropping, enhancing, removing red eye, using filters and using the text tool.

Students will learn how to upload to the web albums and share photos on line as well as learn to email photos.
